

Elastic Loop Extraction Sample

Introduction

This document exercises every tier of the scriptorium pipeline: native text, a table, an embedded bitmap image, a vector diagram, and one image-only scanned page.

Each page targets a specific extraction path so the pipeline's tiered escalation and independent grading can be verified end to end.

Quarterly Results

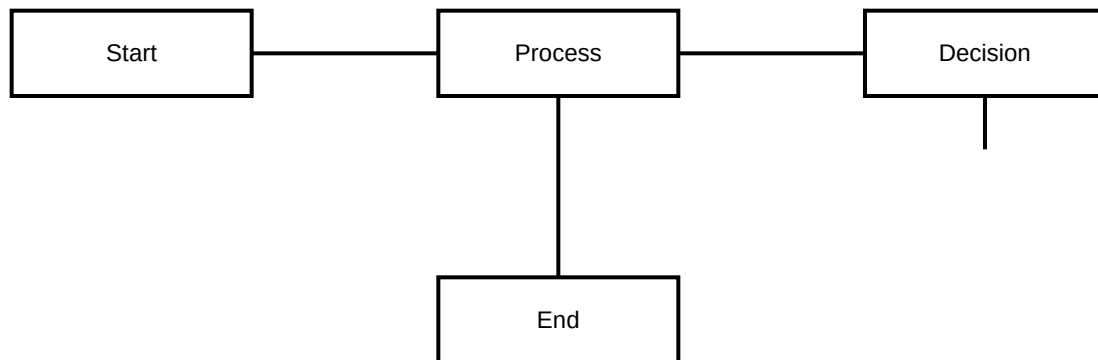

Quarter	Revenue	Growth
Q1	120	-
Q2	150	25%
Q3	180	20%

Figure: Process Diagram

This page is a scanned image with no PDF text layer.

It exists to force Tier 2/3 OCR extraction in the pipeline.

Tesseract should transcribe most of this text correctly.
